DR. JOHN VERHOOGEN, *Department of Geology, University of California, Berkeley, California, U.S.A.*

PROF. L. R. WAGER, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

PROF. F. E. WICKMAN, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. GENERAL

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as "Letters to the Editors". Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned.

II. MANUSCRIPT REQUIREMENTS

1. The manuscript must be written in one of the three official languages—English, French, or German.

2. The manuscript should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Half-tone illustrations should be restricted to the minimum necessary. They should accompany the manuscript mounted on separate sheets. Line drawings that require to be re-drawn should include all relevant details. Photographs should be enlarged sufficiently to permit their clear reproduction in half-tone. If words or numbers appear in photographs, two copies are requested, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should accompany the manuscript on a separate sheet.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS L. H. (1952) *Geochim. et Cosmochim. Acta* **2**, 168.

and should include the standard abbreviated title of the journal, year, volume number, and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

CONTENTS

Nos. 1/2

KONRAD B. KRAUSKOPF: Factors controlling the concentrations of thirteen rare metals in sea-water 1

S. R. NOCKOLDS and R. ALLEN: The geochemistry of some igneous rock series—III 34

HIROSHI ONISHI and E. B. SANDELL: Gallium in chondrites 78

K. V. AUBREY: Frequency-distributions of elements in igneous rocks . . . 83

MARJORIE HOOKER: Data of rock analyses—I. African periodical and serial literature 90

PATRICK M. HURLEY, ESPER S. LARSEN, JR., and DAVID GOTTFRIED: Comparison of radiogenic helium and lead in zircon 98

News and Notes 103

Announcements 103

Erratum 104

No. 3

WILLIAM WAHLER: Über die in Kristallen eingeschlossenen Flüssigkeiten und Gase 105

FRANS E. WICKMAN: The cycle of carbon and the stable carbon isotopes . . 136

E. A. VINCENT and A. A. SMALES: The determination of palladium and gold in igneous rocks by radioactivation analysis 154

No. 4

EDWARD L. P. MERCY: The accuracy and precision of "rapid methods" of silicate analysis 161

K. I. MAYNE: Terrestrial helium 174

LESTER WINSBERG: The production of chlorine-39 in the lower atmosphere by cosmic radiation 183

MARJORIE HOOKER: Data of rock analyses—II. Bibliography and index of rock analyses in the African periodical and serial literature 190

Letter to the Editors:

V. P. SOKOLOFF, A. SEROUSSI and Y. ISRAEL: Trace-metal anomalies in sedimentary rock over petroleum-bearing horizons 214

Book Reviews:

"A New Periodic Table of the Elements" by S. I. TOMKEIEFF (reviewed by L. H. AHRENS) 215

"Chikyu-Kagaku (Geochemistry)" by YASUO MIYAKE (reviewed by P. K. KURODA) . . 215

News and Notes 216

L. R. Wager: A chemical definition of fractionation stages as a basis for comparison of Hawaiian, Hebridean and other lavas 217

Takahisa Hanya et Fumio Sawada: Étude statistique sur les caractères géochimiques des eaux douces au Japon—I 249

D. W. Allan and J. A. Jacobs: The melting of asteroids and the origin of meteorites 256

L. H. Ahrens: The Sc abundance minimum in chondrites and the neutron excess of principal isotopes 273

H. B. Wiik: The chemical composition of some stony meteorites 279

Geochemical Notes:

George W. Wetherill: An interpretation of the Rhodesia and Witwatersrand age patterns 290

G. W. Wetherill, G. R. Tilton, G. L. Davis and L. T. Aldrich: New determinations of the age of the Bob Ingersoll pegmatite Keystone, S. Dakota 292

Letter to the Editors:

Léo Houziaux: Spectres d'absorption infra-rouge de quelques verres naturels entre 2 et 24 microns 298

Announcement 300

AUTHOR INDEX TO VOLUME 9

(B) denotes a book review

Ahrens, L. H. pp. 215 (B), 273
